

Singapore International Water Week 2018 (9 – 11 July)

The Company took part for the 4th time at the Singapore International Water Week. The booth was located at MBS Expo, B2-M21 and supported by Singapore Water Association. Our Japanese, Taiwanese and Malaysian partners lent their support by sending personnel and display products.

The objectives were to introduce new products lineup, enhance customer awareness, raise business profile and communicate future plans.

3 days of active participation saw new contacts made, existing relationships strengthened and for the first time, a keynote speech was undertaken at one of the summit meetings.

The Company is proud to have taken part in this year's exhibition and would like to thank staff and business friends who helped to make it a successful event.
