

Bishan Park Gardening

On 10 August 2018, 14 volunteers went to Bishan Park for a morning gardening activity.

The aim was to enhance the greenery by planting a variety of shrubs that would improve the environmental scenery and attract pollinating insects such as butterflies.

Equipped with a personal changkol and gloves, the team went about digging the grounds to anchor the new plants. Along the way, the volunteers also learnt about the types of plants and their uses. Under the sunny sky and with guidance from NParks officers, the work was completed in 2.5 hours.

The Company thanks the volunteers and NParks for providing the opportunity to create a more beautiful environment and look forward to the fruits of labor in years to come.
