

## Signing of MOU between AnnAik Limited, Singapore and Sihanoukville City Hall for the Collaboration in Decentralised Wastewater Treatment Solutions and Systems

*On [28 Sep 2020], His Excellency; Say Samal, Minister of Environment of Cambodia; and His Excellency; Michael Tan, Ambassador of Singapore in Cambodia had witnessed the signing of MOU in relation to the collaboration in decentralised wastewater treatment solutions and systems between AnnAik Limited and Sihanoukville City Hall.*

*AnnAik Limited (“AnnAik”) is a Singapore incorporated listed company specialise in water and wastewater treatment business. Its footprints and track records of the environmental business rooted from Singapore and expanded to China, Malaysia and Vietnam for the past 15 years. With the strong support from Enterprise Singapore Group (“ESG”) and its local partner; Worldbridge Group, Cambodia, AnnAik completed its first 10m<sup>3</sup>/day treatment capacity system in Ochheuteal beach that serve more than a dozen of restaurants and households for treatment of domestic wastewater to meet stringent requirement set by Ministry of Environment in early of 2020.*

*AnnAik’s patented technology putting together composite anaerobic treatment, high-efficiency phosphorous-removing filters, bioactive bio-filters and high-loading constructed wetland into an innovative and reliable solution. Unlike conventional systems, AnnAik’s decentralised wastewater treatment systems are efficient and unobtrusive, produces no odour and no noise. It is fuss-free with no need for specialists to be stationed on-site and requires only occasional maintenance to achieve the desired outcome which return clean water harmlessly to the environment.*

*Tapping with the MOU, AnnAik and its local partner; Wordbridge Group are committed to deploy its proprietary technology in decentralised wastewater treatment solution by working closely with the local government and Ministry of Environment for new business models and projects in order to provide a cleaner environment in Cambodia.*
